

NATIONAL SUBSTANCE USE AND MENTAL HEALTH SERVICES SURVEY (N-SUMHSS), 2024: CODEBOOK

Center for Behavioral Health Statistics and Quality
Substance Abuse and Mental Health Services Administration

This codebook was prepared for the Substance Abuse and Mental Health Services Administration (SAMHSA), under Contract No. 75S20320C00001 with SAMHSA, U.S. Department of Health and Human Services (HHS). Elizabeth Crane served as the Contracting Officer Representative.

N-SUMHSS Background and Methodology

1. Introduction

For more than two decades, the Substance Abuse and Mental Health Services Administration (SAMHSA) has been collecting data on the substance use (SU) and mental health (MH) services offered by treatment facilities in the United States and its territories¹ using two surveys – the National Survey of Substance Abuse Treatment Services (N-SSATS) and the National Mental Health Services Survey (N-MHSS). In 2021, the N-SSATS and the N-MHSS were combined into one survey – the National Substance Use and Mental Health Services Survey (N-SUMHSS).

The Center for Behavioral Health Statistics and Quality (CBHSQ) at SAMHSA plans and directs the N-SUMHSS. The N-SUMHSS provides a mechanism to quantify the diverse characteristics and composition of SU and MH treatment delivery systems nationwide. The N-SUMHSS collects data on the location, characteristics, and utilization of SU and MH treatment facilities in the United States.

The N-SUMHSS collects multi-purpose data that can be used to:

- Assist SAMHSA, states, and local governments in assessing the nature and scope of services provided in state-supported, state-operated, private non-profit and for-profit SU and MH treatment facilities, and in forecasting SU and MH treatment resource requirements.
- Conduct comparative analyses on treatment provision across the nation, regions, and states. SAMHSA updates and releases N-SUMHSS Annual Reports, Detailed Tables, and State Profiles on an annual basis.²
- Update SAMHSA’s Inventory of Substance Use and Mental Health Treatment Facilities (I-TF), an inventory of all SU and MH treatment facilities in the United States and its territories known to SAMHSA.
- Generate the National Directory of Drug and Alcohol Use Treatment Facilities and the National Directory of Mental Health Treatment Facilities (hereinafter referred to as the “National Directories”). Both National Directories are updated and released to the public on an annual basis.
- Update facility services information published on SAMHSA’s FindTreatment.gov, a comprehensive resource and searchable database of public and private facilities for the provision of SU and MH treatment.³

2. Survey Universe and Coverage

The I-TF is an electronic national inventory of behavioral health facilities maintained by SAMHSA. It contains all SU and MH facilities in the United States and its territories known to SAMHSA. The I-TF is the list frame for the N-SUMHSS. All active and eligible facilities listed in I-TF are contacted to complete the annual N-SUMHSS.⁴

The I-TF contained 27,957 unique behavioral health facilities in the United States and its territories, of which 4,009 unique facilities were found to be either closed or ineligible for the N-SUMHSS. Out of 23,948 facilities eligible for

¹ In the 2024 N-SUMHSS, territories included American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, and the U.S. Virgin Islands.

² To view these reports, please go to: <https://www.samhsa.gov/data/data-we-collect/n-sumhss-national-substance-use-and-mental-health-services-survey>

³ For facility eligibility to be listed on [FindTreatment.gov](https://www.findtreatment.gov), please see the FindTreatment.gov Eligibility section below.

⁴ The inclusion and exclusion criteria for the subset of facilities contacted are listed in the Survey Inclusion and Exclusion Criteria (Section 2.2) in this report.

inclusion in the 2024 N-SUMHSS, 17,829 facilities provided SU treatment (SU facilities), 15,421 facilities provided MH treatment (MH facilities), and 9,302 facilities provided both SU and MH treatment (SU/MH facilities).⁵

2.1. Survey Frame List and Updates

The I-TF contains basic information about each facility, such as name, location address, mailing address, telephone number, director name, and general services offered. Keeping the I-TF facility list updated is of critical importance to improve survey coverage. SAMHSA utilizes comprehensive sources and undertakes major activities to ensure a complete and accurate inventory of behavioral health treatment facilities:

- *Facility List Updated Through States:* Information about new facilities, closed facilities, and changes in facility information in the I-TF is provided primarily by the Single State Agencies (SSAs) and the State Mental Health Agencies (SMHAs). State Representatives designated by the SSAs and SMHAs review, add and/or update the facility list and information for their states in the I-TF system as they identify, license, certify/decertify facilities, and learn of facilities that no longer provide SU and/or MH treatment services, have physically closed, or moved to a different location.
- *Facility List Updated Through the N-SUMHSS:* N-SUMHSS respondents are asked to report all the treatment facilities in their administrative networks when responding to the survey. Facilities identified by the N-SUMHSS respondents are compared against the existing I-TF facility list. Facilities that are determined not to currently exist in the I-TF are added to the I-TF.
- *Facility List Updated Through I-TF Augmentation:* SAMHSA conducts annual augmentation activities to continuously identify new SU and MH facilities that are not currently included in the I-TF. SAMHSA searches for and obtains source files of behavioral health facilities from an array of nationally recognized behavioral health organizations⁶ that maintain facility listings, such as the American Hospital Association. Facilities listed in these sources are compared against the existing I-TF facility list. Facilities that are determined not to currently exist in the I-TF are added to the I-TF and called by SAMHSA to undergo a screening process to determine their eligibility for inclusion in the N-SUMHSS, using an Augmentation Screener.
- *Facility List Updated Through Individual Facilities:* A facility can request to be registered and added to the I-TF through contacting their State Representatives for review and approval or contacting SAMHSA directly by submitting a [Facility Registration Application Form](#). SAMHSA reviews facility registration applications throughout the year and compares the submitted facility information against the existing I-TF facility list. Depending on the time of the year, self-registered facilities that are determined not to currently exist in the I-TF will be added to the I-TF after: receiving approval from their State Representatives, completing the screening process, or being invited for and submitting N-SUMHSS responses as special cases, whichever is completed sooner.

2.2. Survey Inclusion and Exclusion Criteria

To be eligible for the N-SUMHSS, facilities must first be registered and included in the I-TF. This section details the N-SUMHSS inclusion and exclusion criteria.⁷

⁵ Facility counts are not mutually exclusive because facilities offering both SU and MH treatment services are included in SU and MH treatment facility counts. Therefore, caution should be exercised when adding, comparing, or interpreting counts and percentages across facility types.

⁶ New facilities identified through the Opioid Treatment Programs (OTPs) list maintained by SAMHSA's Center for Substance Abuse Treatment (CSAP) are included in the I-TF without going through the screening process.

⁷ Please refer to Section 6 for Inclusion and Exclusion criteria for various N-SUMHSS data products, [FindTreatment.gov](#), and the National Directories. Please note multi-layered inclusion and exclusion criteria for the I-TF, N-SUMHSS, N-SUMHSS data products, [FindTreatment.gov](#), and the National Directories are interdependent, and the criteria are built on another.

N-SUMHSS Inclusion Criteria and Guidelines:

The following types of SU and MH treatment facilities are included in the N-SUMHSS:

- *Psychiatric hospitals* are facilities licensed and operated as either state and/or public psychiatric hospitals or as state-licensed private psychiatric hospitals that primarily provide 24-hour inpatient care to persons with mental illness. They may also provide 24-hour residential care and/or less-than-24-hour care (i.e., outpatient, partial hospitalization/day treatment), but these additional service settings are not required.
- *General hospitals with a separate inpatient SU and/or psychiatric unit* are licensed general hospitals (public or private) that provide inpatient SU and MH services in separate units. These units must have specifically allocated staff and space for the treatment of persons with SU problems and/or mental illness. The units may be located in the hospital itself or in a separate building that is owned by the hospital.
- *State hospitals* are hospitals funded and operated by the government of a state.
- *Veterans Affairs (VA) medical centers* are facilities operated by the U.S. Department of Veterans Affairs, including general hospitals with separate SU and/or psychiatric inpatient units, residential treatment programs, and/or outpatient clinics.
- *Certified community behavioral health clinics* are responsible for directly providing (or contracting with partner organizations to provide) nine types of services, with an emphasis on the provision of 24-hour crisis care, utilization of evidence-based practices, care coordination, and integration with physical health care.
- *Partial hospitalization/day treatment facilities* provide only partial day SU and MH services to ambulatory clients, typically in sessions of three or more hours on a regular schedule.
- *Outpatient facilities* provide only outpatient SU and/or MH services to ambulatory clients, typically for less than three hours at a single visit. The services may include detoxification, methadone and/or buprenorphine treatment.
- *Residential treatment centers (RTCs) for children* are facilities not licensed as psychiatric hospitals that primarily provide individually planned programs of mental health treatment in a residential care setting for children under age 18 years. (Some RTCs for children may also treat young adults). RTCs for children must have a clinical program that is directed by a psychiatrist, psychologist, social worker, or psychiatric nurse who has a master's or doctoral degree.
- *Residential treatment centers (RTCs) for adults* are facilities not licensed as psychiatric hospitals that primarily provide individually planned programs of mental health treatment in a residential care setting for adults.
- *Multi-setting mental health facilities*⁸ provide mental health services in two or more service settings (nonhospital residential, plus either outpatient and/or partial hospitalization or day treatment), and are not classified as a psychiatric hospital, general hospital, medical center, or residential treatment center.
- *Community mental health centers (CMHCs)* provide either (1) outpatient services, including specialized outpatient services for children, the elderly, individuals who are chronically mentally ill, and residents of its mental health service area who have been discharged from inpatient treatment at a mental health facility; (2) 24-hour emergency care services; (3) day treatment or other partial hospitalization services, or psychosocial rehabilitation services; or (4) screening for patients being considered for admission to state mental health facilities to determine the appropriateness of the admission. To be classified as a CMHC, a facility must meet applicable licensing or certification requirements for CMHCs in the state in which it is located.

⁸ The classification of psychiatric hospital, general hospital, medical center, or residential treatment center—any of which can offer mental health services in two or more service settings—takes precedence over a multi-setting classification.

- *Other types of residential treatment facilities* refer to facilities not licensed as psychiatric hospitals. The primary purpose of other types of residential treatment facilities is to provide individually planned programs of mental health treatment services in a residential care setting; such facilities are not specifically for children or adults only.

N-SUMHSS Exclusion Criteria and Guidelines:

The following types of SU and MH treatment facilities are excluded in the N-SUMHSS based on their responses to the prior N-SUMHSS and/or the most recent information in the I-TF:

- SU and/or MH treatment facilities that were identified as closed and/or with a “closed” status in the I-TF.
- SU and/or MH treatment facilities self-reported that they were a jail, prison, or detention center that provided treatment exclusively for incarcerated persons or juvenile detainees;
- SU treatment facilities that self-reported that they only provide nontreatment services (with the exception of state approved nontreatment substance use halfway houses);
- MH treatment facilities self-reported that they were either a solo or small group practice and they were not licensed or accredited as a mental health clinic or a mental health center;
- MH treatment facilities self-reported that they were operated by the United States Department of Defense (DoD); and
- MH treatment facilities that self-reported that they only provided nontreatment services, that is, facilities only provided one or more of the following services: crisis intervention services, psychosocial rehabilitation, cognitive rehabilitation, intake, referral, MH evaluation, health promotion, psychoeducational services, transportation services, respite services, consumer-run and peer support services, housing services or legal advocacy, and/or are residential facilities whose primary function was not to provide specialty MH treatment services. These facilities included nursing homes, foster care/therapeutic foster care, assisted living/supported housing, and group homes.

3. Survey Content

The 2024 N-SUMHSS contained 83 numbered questions. The survey consisted of two screening questions, four separate modules, and Electronic Health Records (EHR) questions:

- Module A focused on SU treatment services;
- Module B focused on MH treatment services;
- Module C focused on facility characteristics; and
- Module D focused on the number of clients in treatment for a given day, month, or 12-month period.

The screening questions requested information on the primary treatment focus of the facility and whether the facility was a jail. These two questions indicated which module(s) of the survey each facility would be asked to complete. Facilities providing both SU and MH treatment services were asked to complete all four modules and the EHR questions, whereas those providing only SU treatment services were asked to complete Modules A, C, a portion of Module D, and the EHR questions. Facilities providing only MH treatment services were asked to complete Modules B, C, a portion of Module D, and the EHR questions. In addition, facilities operated by the U.S. Department of Veterans Affairs (VA) were asked to complete additional questions regarding services offered. These addenda included 7 questions for SU facilities and 12 questions for MH facilities.

Screening topics included:

- Primary treatment focus; and
- Jail, prison, or detention center status.

Module A – Topics included in the SU portion of the survey included:

- SU treatment services available;
- detoxification from alcohol, benzodiazepines, opioids, cocaine, methamphetamines, or other drugs and routine use of medication during detoxification;
- type of care provided, i.e.,
 - outpatient treatment services (regular outpatient treatment, intensive outpatient treatment, day treatment or partial hospitalization, detoxification, methadone maintenance, buprenorphine maintenance, or naltrexone treatment);
 - residential (non-hospital) treatment services (long-term—more than 30 days, short-term—30 days or fewer, detoxification); and
 - hospital inpatient treatment services (inpatient treatment, inpatient detoxification);
- treatment services offered (assessment and pre-treatment services, medical services, recovery support services, education and counseling services, pharmacotherapies, testing, transitional services, ancillary services, and other services);
- treatment(s) available for opioid use disorder;
- treatment(s) available for alcohol use disorder;
- clinical therapeutic approaches;
- provision of treatment services in sign language and/or in languages other than English;
- special programs or groups provided for specific client types;
- licensure, certification, or accreditation agencies or organizations; and
- payment type or insurance accepted.

Module B – Topics included in the MH portion of the survey included:

- services offered;
- type of care provided, i.e.,
 - 24-hour hospital inpatient;
 - 24-hour residential;
 - partial hospitalization/day treatment; and
 - outpatient treatment services;
- type of MH facility (e.g., psychiatric hospital, separate inpatient unit of a general hospital, state hospital, residential treatment center for children, etc.);
- treatment modalities for MH treatment;
- use of antipsychotics and type of medications used;
- services offered (intensive case management, court-ordered treatment, integrated primary care services, education services, suicide prevention services, etc.);
- age groups accepted for treatment;
- special programs or groups provided for specific client types;
- availability of emergency psychiatric services;
- provision of treatment services in sign language and/or in languages other than English;
- quality improvement practices;
- use of seclusion or restraint;
- payment types or insurance accepted; and
- licensure, certification, or accreditation agencies or organizations.

Module C – Topics in the treatment facility information portion of the survey included:

- Federally Qualified Health Center (FQHC) status;
- facility operating entity;

- religious or faith-based organization affiliation;
- facility smoking and vaping policies;
- payment and fee information;
- listing preferences for SAMHSA’s FindTreatment.gov and National Directories; and
- parent organization information, if applicable.

Module D – Topics in the client counts portion of the survey included:

- number of facilities included in the counts;
- number of clients receiving inpatient, residential, and outpatient SU disorder treatment services on March 29, 2024;
- number of inpatient and residential beds designated for SU disorder treatment on March 29, 2024;
- number of clients in treatment for use of 1) both alcohol and substances other than alcohol, 2) only alcohol, 3) only substances other than alcohol;
- percentage of SU clients with diagnosed co-occurring mental disorder and SU disorder;
- number of SU disorder treatment admissions for the most recent 12-month period;
- number of clients receiving inpatient, residential, and outpatient MH treatment on March 29, 2024;
- number of inpatient and residential beds designated for mental disorders treatment on March 29, 2024;
- number of mental disorder treatment admissions, readmissions, and incoming transfers between April 1, 2023, and March 29, 2024; and
- percentage of total admissions that were military veterans.

EHR – Topics in the EHR portion of the survey included:

- use of an EHR system;
- name of EHR system vendor;
- inclusion of clinical information received electronically;
- provision of access to EHR clinical information from external organizations;
- frequency of electronic searches for clients’ health information from other providers;
- participation in state, regional, and/or local Health Information Exchange Organizations;
- frequency of electronically available health information from other providers;
- use of EHR capabilities;
- Opioid Treatment Program (OTP) status;
- tracking of dispensed medications in EHR system;
- client permissions in EHR system;
- unavailable functions in current EHR system;
- satisfaction with current EHR system.

4. Survey Method and Data Collection

4.1. Survey Fielding Periods and Reference Date

The 2024 N-SUMHSS field period was from March 29, 2024, through December 9, 2024. The survey reference date was March 29, 2024.

In addition to the annual N-SUMHSS, a “Between Cycle” N-SUMHSS (hereinafter referred to as the “Mini N-SUMHSS”) was conducted as a mechanism of collecting services data from new facilities identified and added to the I-TF between June 2024 and February 2025 (Appendix B, Section 2.1). The Mini N-SUMHSS is a subset of questions derived from the N-SUMHSS. New facilities that have completed the Augmentation Screener and Mini

N-SUMHSS, meeting all survey eligibility criteria, may choose to be added to [FindTreatment.gov](https://www.findtreatment.gov) and the relevant National Directories without having to wait for the following year's survey cycle. Although Mini N-SUMHSS data were not included in the 2024 N-SUMHSS analyses and public use data files, they were used to update information on [FindTreatment.gov](https://www.findtreatment.gov) to ensure that new treatment facilities and their service information is available to the public in a timely manner.

4.2. Survey Mode

The 2024 N-SUMHSS was a multimode survey. Data collection included three modes: 1) a secure web-based survey, 2) a paper survey, and 3) a computer-assisted telephone interview (CATI). All data collection modes of the N-SUMHSS were available to facilities throughout the data collection period.

4.3. Outreach Strategies

Continuous Collaboration with States

States serve as critical influencers, stakeholders, and partners for the N-SUMHSS. The N-SUMHSS Support Team established early contact with State Representatives to inform them of the upcoming survey and request States' support in encouraging facility participation. Throughout the survey administration, State Representatives were regularly informed of their state's progress and encouraged to further reinforce survey participation.

Advance Outreach with Facilities

Advance letters and emails announcing the upcoming N-SUMHSS administration were sent to treatment facilities in late February 2024, approximately six weeks before the launch of the survey. The advance contact served as an introduction to the N-SUMHSS to encourage treatment facilities' participation and reinforce that the effort is nationwide.

Invitation Packet(s)

The first invitation packet was sent via mail and email in late March 2024. The invitation packet included a personalized cover letter, a letter of support (if received from the jurisdiction representative), a personalized web survey access flyer with instructions and help desk contact information, a Frequently Asked Questions (FAQs) fact sheet, and a Client Counts Worksheet. Facilities that had not responded by around late May 2024 and by the middle July 2024 were sent a second and third packet including the same materials as in the first invitation packet via mail and email. A hard copy of paper survey along with a postage paid business reply envelope was also included in the third packet.

Thank-you Letters and Reminders

Following the advance outreach and initial invitation packet, facilities received a range of sequential outreach contacts to encourage participation in the N-SUMHSS, as noted below:

- Thank you/reminder letter and email (approximately 1 week after N-SUMHSS invitation)
- Second reminder email (approximately 5 weeks after initial N-SUMHSS invitation)
- Second N-SUMHSS invitation packet mailing and email (approximately 7 weeks after initial N-SUMHSS invitation)
- Third reminder email (approximately 10 weeks after initial N-SUMHSS invitation)
- Third N-SUMHSS invitation packet mailing (approximately 19 weeks after initial N-SUMHSS invitation)
- Nonresponse follow-up letters and emails (approximately 27 weeks after initial N-SUMHSS invitation)
- Countdown emails (approximately 35 weeks after N-SUMHSS invitation)

CATI Follow-ups

On July 19, 2024, facilities that had not yet completed the N-SUMHSS began to receive CATI-based calls. The calls occurred in two phases:

- Phase 1 (July 19, 2024 – August 30, 2024): Calls to facilities that had not completed the N-SUMHSS to verify the best point of contact for the facility, confirm receipt of the survey materials, and remind them to complete the survey. If the facility requested it, the N-SUMHSS was administered on the phone during this reminder call.
- Phase 2 (August 19, 2024 – December 9, 2024): Calls to facilities to complete the NSUMHSS over the phone.

Technical Assistance

Throughout the survey fielding period, resources were available to help facilities complete the survey such as a toll-free N-SUMHSS hotline, a designated N-SUMHSS email address, and a dedicated N-SUMHSS information website (<https://info.nsumhss.samhsa.gov/>). In addition, the N-SUMHSS Support Team communicated directly with facilities to answer questions, relayed facility updates to the data team, and helped troubleshoot technical issues. The N-SUMHSS Support Team's ability to pivot from technical support to survey administration, as appropriate, resulted in a better customer service experience and delivered more immediate resolution for participating facilities.

5. Data Validation and Quality Assurance

Data validation and quality assurance measures are taken throughout all stages of the survey cycle:

- *Pre-survey*: a thorough technical review of the 2024 survey, both web and paper versions, was conducted. Both the web and paper versions of the approved survey were developed and tested in English and Spanish to ensure that the web instrument was programmed accurately with logic and edit checks; and the paper instrument was formatted with clear instructions and navigation guidance.
- *During Survey*: the web instrument included automated validation checks that flagged potential inconsistencies in reported responses and prompted respondents to review, confirm, and/or reconcile answers before advancing to the next question. All completed web surveys underwent an automated review for inconsistencies and missing data. Emails and calls to facilities were placed to clarify questionable responses and obtain missing data. All completed mail surveys underwent a manual review for inconsistencies and missing data. Emails and calls to facilities were placed to clarify questionable responses and obtain missing data. After data entry of mail surveys, automated quality assurance reviews were conducted on all survey response data. The reviews incorporated the rules used in manual editing plus consistency checks not readily identified by manual review.
- *Post-survey*: once the survey was closed and data validations were completed, a final data cleaning step was performed using an automated machine cleaning program. An extensive, rigorous, and multi-layered data quality control and review process were implemented across all N-SUMHSS data products.

6. Survey Products and Dissemination

The N-SUMHSS data is disseminated in the format of N-SUMHSS Annual Report,⁹ N-SUMHSS State Profiles,¹⁰ Public Use Files (PUFs),¹¹ [FindTreatment.gov](https://www.samhsa.gov/data/data-we-collect/n-sumhss-national-substance-use-and-mental-health-services-survey), and the National Directories,¹² in addition to various short reports, infographics, and special studies.

6.1. N-SUMHSS Annual Report

Data Presented in 2024 N-SUMHSS Annual Report

There were 20,813 SU facilities, 17,754 MH facilities, and 10,610 combined SU/MH treatment facilities in the survey, of which 2,984 (14.3%) SU, 2,333 (13.1%) MH, and 1,308 (12.3%) treatment facilities were found to be closed or ineligible for the N-SUMHSS. Of the treatment facilities eligible for the survey, 16,071 SU facilities, 14,121 MH facilities, and 8,879 combined SU/MH facilities completed the survey. With the exclusion of 118 SU facilities, 30 MH facilities, and 40 SU/MH facilities (see footnotes and “N-SUMHSS Annual Report Inclusion and Exclusion Criteria” below for details), 15,953 SU facilities, 14,091 MH facilities, and 8,839 combined SU/MH facilities were included in the 2024 N-SUMHSS Annual Report. Of those treatment facilities eligible for the report, 98.7% of SU facilities, 99.1% of MH facilities, and 99.3% of combined SU/MH facilities completed the survey on the web respectively.

N-SUMHSS Annual Report Inclusion and Exclusion Criteria

Among the population of facilities included in the 2024 N-SUMHSS survey universe, the following facilities were excluded from the 2024 N-SUMHSS Annual Report based on their responses to the 2024 N-SUMHSS:

- SU and/or MH treatment facilities that were identified as closed;
- SU and/or MH treatment facilities self-reported that they were a jail, prison, or detention center that provided treatment exclusively for incarcerated persons or juvenile detainees;
- SU and/or MH facilities whose client counts were included in or “rolled into” other facilities’ counts and whose facility characteristics were not reported separately;
- SU treatment facilities that self-reported being a solo practice, that is, an office with only one independent practitioner or counselor, and have not been approved by their State Representative;
- SU treatment facilities self-reported that they only provide nontreatment services, that is, facilities that only provide intake assessment, referral, or any other substance use nontreatment services;
- Halfway houses that did not provide SU treatment were excluded from the N-SUMHSS Annual Report, analyses, and public use data files. However, state approved halfway houses were included in the I-TF and the survey universe so that they could be listed in the National Directory of Drug and Alcohol Use Treatment Facilities and on FindTreatment.gov;
- MH treatment facilities self-reported that they were either a solo or small group practice and they were not licensed or accredited as a mental health clinic or a mental health center;
- MH treatment facilities self-reported that they were operated by the United States Department of Defense (DoD); and
- MH treatment facilities self-reported that they only provided nontreatment services, that is, facilities only provided one or more of the following services: crisis intervention services, psychosocial rehabilitation, cognitive rehabilitation, intake, referral, MH evaluation, health promotion, psychoeducational services,

⁹ N-SUMHSS annual report are available on the SAMHSA website: <https://www.samhsa.gov/data/data-we-collect/n-sumhss-national-substance-use-and-mental-health-services-survey>.

¹⁰ N-SUMHSS state profiles are available on the SAMHSA website: <https://www.samhsa.gov/data/quick-statistics>.

¹¹ N-SUMHSS PUFs and Codebooks are available on the SAMHSA website: <https://www.samhsa.gov/data/data-we-collect/n-sumhss-national-substance-use-and-mental-health-services-survey>.

¹² The National Directories are available (in both PDF and Excel format) on the SAMHSA website: <https://www.samhsa.gov/data/data-we-collect/n-sumhss-national-substance-use-and-mental-health-services-survey>.

transportation services, respite services, consumer-run and peer support services, housing services, or legal advocacy, and/or are residential facilities whose primary function was not to provide specialty MH treatment services. These facilities included nursing homes, foster care/therapeutic foster care, assisted living/supported housing, and group homes.

Table B-1 presents a summary of eligibility and response information.

Table B-1: Treatment Facilities by Status, Mode of Response, and Type, 2024 N-SUMHSS

	SU Facilities		MH Facilities		Combined SU and MH Facilities ¹³	
	N	%	N	%	N	%
Total facilities in survey	20,813	100.0	17,754	100.0	10,610	100.0
Closed or ineligible	2,984	14.3	2,333	13.1	1,308	12.3
Eligible	17,829	85.7	15,421	86.9	9,302	87.7
Total eligible	17,829	100.0	15,421	100.0	9,302	100.0
Non-respondents	1,758	9.9	1,300	8.4	423	4.5
Respondents	16,071	90.1	14,121	91.6	8,879	95.5
Excluded from report ¹⁴	38	0.2	0	0.0	25	0.3
Roll-ups ¹⁵	80	0.4	30	0.2	15	0.2
Eligible for report	15,953	89.5	14,091	91.4	8,839	95.0
Mode of response	15,953	100.0	14,091	100.0	8,839	100.0
Internet	15,744	98.7	13,970	99.1	8,781	99.3
Mail	72	0.5	44	0.3	9	0.1
Telephone	137	0.9	77	0.5	49	0.6

Response Rate Calculations

The 2024 N-SUMHSS unit response rate among facilities eligible for the survey was calculated using the American Association for Public Opinion Research (AAPOR) Response Rate 4 (RR4) standard definition.¹⁶ AAPOR is the industry standard for survey research and the nationally recognized body with the mission to advance the science of survey research. The RR4 was specifically selected since it meets the following key criteria:

1. RR4 is a well-documented methodology commonly used to calculate survey response rates in surveys of establishments and individuals.
2. RR4 recognizes that a proportion of cases in the frame whose eligibility is unknown may, in fact, be eligible for participation. Applying information about observed eligibility to the subgroup of cases with unknown eligibility, RR4 calculates an eligibility rate to estimate the number of facilities that are likely to be eligible for the survey.

¹³ Facility counts and percentages are not mutually exclusive because facilities offering both SU and MH treatment services are included in SU and MH facility counts. Therefore, caution should be exercised when adding, comparing, or interpreting counts and percentages across facility types.

¹⁴ Facilities excluded from the SU counts included 16 halfway houses, 1 solo practitioner, and 1 facility that provided administrative services only. One (1) halfway house facility is excluded from the combined SU and MH counts.

¹⁵ Facilities whose client counts were included in or “rolled into” other facilities’ counts and whose facility characteristics were not reported separately.

¹⁶ AAPOR RR4 standard definitions are available on the AAPOR website: <https://aapor.org/wp-content/uploads/2024/03/Standards-Definitions-10th-edition.pdf>.

- a. This happens when the number of cases coded as out of sample (e.g., sample duplicates, establishments that are out of business or have merged with another establishment, or whose services have changed in a manner that renders them ineligible for the N-SUMHSS) is determined to inform the estimated proportion of the non-finalized sample that is ineligible.
3. RR4 includes only completed and partially completed surveys in the numerator of the response rate calculation so that the estimated eligibility can be calculated correctly. The N-SUMHSS methodology designates closed facilities and jails as ineligible for participation and, therefore, removes them from the denominator.
4. RR4 allows the N-SUMHSS multi-mode outcomes from telephone and mail contact to be taken into consideration at the appropriate times.

Table B-2 below provides the 2024 N-SUMHSS completion status and corresponding RR4 code.

Table B-2: Survey Completion Status and RR4 Code, 2024 N-SUMHSS

Final Status	Definition	Count	RR4 Code
001	Complete – Telephone	163	1.0
002	Complete – Mail	105	1.0
004	Closed – No longer exists	1,043	4.1
006	No participation ¹⁷	2,326	3.0
007	Refused ¹⁸	309	2.1
008	Closed – Ineligible or other ¹⁹	2,092	4.1
009	Complete – Web	19,308	1.0
011	Client counts only	95	1.2
015	Client counts unavailable	1,644	1.2
024	Closed – Duplicate facility	495	4.1
034	Closed – Merged	24	4.1
044	Closed – No SU or no MH treatment ²⁰	390	4.1
054	Closed – Satellite facility	19	4.1
064	Primary focus is SU treatment	6	1.0
071	Jail only	5	4.1
072	Halfway house only	8	1.0
074	Individual or small group	64	1.0

The overall response rate for the 2024 N-SUMHSS was 90.4%, which was calculated by applying the RR4 codes outlined in the table B-2 as follows:

$$\text{Response Rate} = (1.0 + 1.2) / ((1.0 + 1.2) + (2.1) + e(3.0))$$

Where:

1.0 is a completed interview.

1.2 is a partial interview.

2.1 is a refusal.

3.0 represents non-contacts (e.g., answering machine, fax machine, callbacks, etc.).

¹⁷ No participation is defined by a facility that did not respond to the survey.

¹⁸ Refused is defined as a facility that actively declined to participate in the survey.

¹⁹ Facility determined to be included in the sample in error because it is not a behavioral health (SU/MH) facility (e.g., bus company).

²⁰ Closed – No SU or no MH treatment is a result of a survey response to that question.

4.1 represents an ineligible contact (e.g., facility closed, merged with another facility, duplicate of another facility, jail).

e is the estimated proportion of cases of unknown eligibility that are eligible:
 $(1.0+1.20+2.10) / (1.0+1.20+2.10+4.10)$.

Unrolling Client Counts to ‘Child’ Facilities

In the 2024 N-SUMHSS, facilities had the option to (1) report SU and MH client counts separately for each of three service settings (inpatient, residential, and outpatient) for their facility only; (2) report client counts for their facility plus additional facilities; or (3) rely on another facility to report client counts for them. A self-reported facility reported client counts for only itself. A parent facility reported client counts for other facilities in addition to itself. A child facility relied on a parent facility to report its client counts. The parent facility together with its child facilities is a family of facilities. In tabulations for this report, client counts reported by the parent facility were used. However, for accuracy in certain calculations, such as median counts, clients per facility, and mean beds per facility, client counts reported by a parent facility needed to be distributed (unrolled) among the family of facilities.

To unroll client counts to several facilities within a family of facilities, an empirical distribution of client counts by patients who received each service type was used. This distribution was completed separately for SU and MH client counts and was conditional on the service setting or settings in which the facility provides SU or MH treatment.

The SU inpatient client counts reported by the parent facility were equally distributed among the 24-hour hospital inpatient SU facilities within the family of facilities. The SU residential client counts reported by the parent facility were equally distributed amongst the 24-hour residential SU facilities within the family of facilities. The SU outpatient client counts reported by the parent facility were equally distributed amongst the outpatient SU facilities within the family of facilities. The same methodology was used in the distribution of MH client counts across the MH facilities within a family of facilities.

Table B-3 is an example that best illustrates how to distribute or unroll parent facility SU or MH client counts to a family of facilities: If a parent facility reported 60 inpatient clients, 300 residential clients, and 550 outpatient clients and it indicated that they were reporting for three facilities, then the parent facility’s client counts needed to be distributed among three facilities—A, B, and C. Facility A offers all three service settings, Facility B offers hospital inpatient and outpatient service settings, and Facility C offers only the hospital inpatient service setting. Therefore, this parent facility is reporting for three inpatient facilities, one residential facility, and two outpatient facilities. Drawing on this information, the following proportions are used to unroll the parent client counts to the three facilities:

Table B-3: Example of Unrolled Facility Client Counts

	Service Setting Type		
	Inpatient	Residential	Outpatient
Parent count	60	300	550
Facility A	20	300	275
Facility B	20	0	275
Facility C	20	0	0

6.2. National Directories and FindTreatment.gov

Selected information collected from the N-SUMHSS is published and disseminated through the National Directories. The National Directories are listings of public and private SU and MH treatment facilities in the states and jurisdictions respectively. Information about each facility includes facility name, address, telephone number, types of

services offered, type of payment, and other features of the facility (such as services for hearing impaired and non-English-speaking clients). The Directories are ordered by state, city, and facility name within each city.

Selected information collected from the N-SUMHSS is also published on SAMHSA's FindTreatment.gov. FindTreatment.gov is authorized by the 21st Century Cures Act (Public Law 114-255, Section 9006; 42 U.S.C. 290bb-36d). It is a publicly available and searchable online resource for persons seeking SU and MH treatment services in the United States and its territories. FindTreatment.gov had more than 3.3 million views in 2024, reiterating the critical importance of providing comprehensive, timely, and accurate facility and treatment service information to the public through the N-SUMHSS data collection. As of 2024, FindTreatment.gov is available in both English and Spanish. To be listed on the FindTreatment.gov is one of the major incentives for facilities responding to the N-SUMHSS.

In addition to meeting the Inclusion and Exclusion Criteria for the I-TF and N-SUMHSS (Appendix B, Section 2.1 and Section 2.2), facilities must also meet the following criteria to be included in the National Directories and FindTreatment.gov:²¹

- Eligible facilities must have responded to the most recent N-SUMHSS;
- Eligible facilities must provide consent to be listed on the respective National Directory and FindTreatment.gov when responding to the N-SUMHSS; and
- Eligible SU facilities must be licensed, certified, or otherwise approved for inclusion in the Directory and FindTreatment.gov by their SSAs.

7. Data Considerations and Limitations

As with any data collection effort, certain procedural considerations and data limitations must be considered when interpreting data from the 2024 N-SUMHSS, as discussed below:

- The N-SUMHSS is a voluntary facility survey. While substantial effort is made to obtain responses from all known SU and MH treatment facilities within the scope of the survey, some facilities did not respond. There was no adjustment for the 9.6% facility non-response.
- The N-SUMHSS is a point-prevalence survey. It provides information on the SU and MH treatment system and its clients as of a pre-selected reference date (March 29, 2024). Client counts reported here do not represent annual totals. Rather, the N-SUMHSS provides a snapshot of SU and MH treatment facilities and clients for a specific day, month, or 12-month period.
- Multiple responses were allowed for certain survey items (e.g., services provided in non-English languages and type of payment or insurance accepted for treatment services). Tabulations of data for these items include the total number of facilities reporting each response category.
- Reported client count totals that fell within a variance of +/- 10 and client percentages that fell within a variance of +/- 5 were not adjusted. Therefore, the public-use file contains percentage values of over 100%.
- The N-SUMHSS is an integration of the legacy N-SSATS and N-MHSS surveys. The creation of a single survey instrument introduced a data validation issue with the way facilities responded to Questions 1, 1a, A1, A1a, and B1 where respondents were asked about the type of services offered. Some facilities would only accept patients for either MH or SU treatment services. However, if that patient had a co-occurring SU or MH need outside of their intake diagnostic requirement, they would be offered treatment at that facility as well. For these facilities that will only accept either SU or MH clients, but will offer treatment

²¹ A step-by-step infographic of "How Are Facilities Listed on Treatment.gov" could be accessed at: https://www.samhsa.gov/data/sites/default/files/How_are_facilities_listed_on_FindTreatment.pdf

for a co- occurring disorder, a data change was made to accurately reflect their primary mode of treatment.

- The integration of the N-SSATS and the N-MHSS surveys also introduced the possibility of duplicate records for facilities that had previously completed each survey and beginning in 2021 were now only asked to complete the N-SUMHSS once. Facility information was carefully reviewed to ensure unduplicated information, but it is possible that some duplicate facilities with updated contact information were not identified.
- The N-SUMHSS methodology (including, but is not limited to, target population and sampling frame, inclusion and exclusion criteria, survey mode, question wording, data collection period and reference period) is unique and specific to treatment services reported voluntarily by both public and private facilities. We urge readers of this report to exercise caution when using the N-SUMHSS data for comparisons with any other survey or administrative data, as various data sources may not be directly comparable.

FREQUENCIES

Note: The number in parentheses that follows each variable's headline description, e.g. "(Q.7)," denotes the corresponding question and response in the [survey instrument](#) from which the variable is drawn
